For Immediate Release

**McMAHON ASSOCIATES, INC.
RELOCATES ITS EXTON OPERATIONS TO
LARGER OFFICES IN CHESTER COUNTY**

Exton, Pennsylvania -- McMahon Associates, Inc., Transportation Engineers and Planners, announces the relocation of its Exton, Chester County, Pennsylvania office. Being one of the fastest growing counties in PA, our success in serving clients in this western region of the Delaware Valley has led to our rapid growth and the need for additional office space. On January 12, 2004, the firm opened the doors to its new location at 860 Springdale Drive, Suite 200, Exton, PA 19341. The contact numbers will remain the same: 610-594-9995 (phone) 610-594-9565 (fax).

As traffic specialists, we recognize that as this region continues to develop and grow, it will face increased traffic issues and challenges. "Adequate transportation infrastructure continues to be a major cornerstone of successful development," states Vice President and General Manager, Joe DeSantis, P.E., P.T.O.E. "Our need for more space in Chester County not only demonstrates our ongoing and active role as transportation consultants serving both municipalities and development in concert with this growth, but also our commitment to provide transportation solutions that create a safe travel environment for residents, businesses, and the traveling public in this region."

-more-

Regionally, McMahon Associates proudly serves several townships and planning organizations in Chester County, as well as many others in Berks, Bucks, Delaware, and Montgomery Counties. In this role, we have become sensitive to, and knowledgeable of, issues related to these municipalities' responsibilities to provide effective transportation planning, design, and improvement implementation to accommodate growth within their boundaries. Likewise, we provide similar services to private clients, developers and corporations, in conjunction with their land development proposals in other Chester County municipalities.

McMahon's three mid-Atlantic offices, located in Exton, Chester County, Fort Washington, Montgomery County (corporate headquarters), and Middletown, Dauphin County, PA, combined currently employ 65 of the company's 110 full-time employees. It also has offices in Florida and Massachusetts. McMahon's services specialize in transportation planning/traffic studies, traffic signal/ITS design and permitting, highway/intersection design and permitting, survey, GIS, and construction inspection for both public and private clients.

To request additional information about our services in and around Chester County, please contact Christopher J. Williams, P.E., Associate and Senior Project Manager, at 610-594-9995 or via email, chris.williams@mcmtrans.com.
