For Immediate Release

McMAHON SELECTED FOR TWO MAJOR TRANSPORTATION PROJECTS IN FLORIDA

Fort Myers, FL, December 10, 2007 - McMahon Associates, Inc., a full-service transportation engineering and planning firm with service since 1976, has been awarded the Estero Boulevard Corridor Analysis and Design project in Fort Myers Beach and a District-wide Traffic Operations Studies for Florida Department of Transportation (FDOT) - District Four.

Estero Boulevard is an approximate 7 mile corridor that is the sole road traversing the barrier island of the Town of Fort Myers Beach. This road is the only way on or off the island, and it also serves as the main commercial hub and transportation corridor. The town is a popular tourist destination, and part of our challenge will be limiting the disruption of the tourism trade. Additionally, there are severe challenges posed by limited right-of-way, stringent stormwater restrictions, hurricane evacuation planning, and a highly charged political environment. This first task will be to complete the planning for a pilot design segment along the corridor, but may be up to one-mile in length. Upon acceptance, the project will move into the design phase.

The second project is the five-county district-wide Traffic Operations Studies, for the District Four offices of the FDOT. This project requires the completion of complex studies and in-house staff support.

McMahon Associates, Inc. specializes in traffic engineering and design services, with regional offices in Palm Beach Gardens, Fort Lauderdale, Miami and Fort Myers, Florida, and over 150 full-time employees firm wide. Other markets served are New England and the Mid-Atlantic states. For further information, call John S. DePalma, vice president and Florida regional manager, at 561-840-8650, or send an email to john.depalma@mcmtrans.com.
